I'm an advanced **full-stack software developer** and **data science** student. Currently, my main goal is to find a dynamic and challenging working environment that will enable me to utilize my skills and develop new tools for innovative software development schemes.

I have honed my **efficiency in teamwork** and thrive in collaborative environments where members are empowered to contribute with their unique perspectives.

Within my soft skills, my strenghts lie in my **thoroughness**, **creativity** and **fast learning** abilities. I'm fully determined to achieve success while improving my set of technical skills.

Moreover, I stand out my strong commitment with the **English language**, which enables me to collaborate effectively with team members and clients alike.
